

EXPERIENCE

SENIOR MEMBER OF TECHNICAL STAFF SALESFORCE, HYDERABAD Unified Context Engineering, ADX (April 2025 to Present)

- Lead development for an in-house code search tool called **CodeSearch** to **replace Sourcegraph** and **extend it** for Salesforce internal needs. Received **50 NPS** after collaborating with pre-GA users.
- Horizontally scalable architecture on K8s that dynamically provisions to handle traffic (including large monorepos) without compromising on speed.
- SLA-based indexing backend, multiple code host support, code authorization, tight integration with DX tools, code ownership, MCP support, streaming APIs.
- Experimented with **Knowledge Graphs** and other similar knowledge storing strategies using AWS Neptune.
- Currently working on the **infrastructure layer for running AI agents** on different workspaces (including monorepos) that are created on-demand.
- Python, Kubernetes (K8s), Docker, Multithreading, Go, C++, Github, Gitlab, Perforce, CMake

MEMBER OF TECHNICAL STAFF SALESFORCE, HYDERABAD Core-SCM Perforce, Developer Productivity XP (August 2022 - April 2025)

- Expanded Sourcegraph by onboarding code from acquisitions, while maintaining high uptime and solid infrastructure backing for the application.
- Fastest SG instance among all customer instances at the time, as reported by SG staff.
- Ran evals for internal tools vs Sourcegraph Cody by running it on Perforce monorepos to check the efficiency of **using vector embeddings based code context** for better code generation.

ASSOCIATE MEMBER OF TECHNICAL STAFF SALESFORCE, HYDERABAD Core-SCM Perforce, Developer Productivity XP (June 2021 - August 2022)

- **Installed Sourcegraph inside Salesforce for 15K developers** after running a few months long PoC project. Maintained and customized the service to fit internal needs.
- Creator and maintainer of [p4-fusion](#) on Github, a multi-threaded, fast, reliable Perforce to Git converter written in C++. Allowed SG to work on our Perforce monorepo with a **100x performance boost**. [Blog](#) and [webinar](#) published with Sourcegraph.

STUDENT AND MENTOR GODOT ENGINE, GOOGLE SUMMER OF CODE | [CODE](#) | [DOCS](#) Summer 2019 and Summer 2020

- Created the Godot VCS integration to allow users to easily version control their code without leaving the editor. Mentored a feature expansion of the VCS Integration project in GSoC 2020.
- C++, CMake, SCons

PROJECTS

HIGH PERFORMANCE C++17 ADVANCED 3D GAME ENGINE SDSLABS, IIT ROORKEE | [CODE](#) | [DOCS](#) | [BLOG](#) 2019 - 2021

- **High performance** achieved through CPU and memory cache efficient ECS and judicious memory management in C++ mixed in with a healthy amount of object orientation. Featured on Gamefromscratch on YouTube. [Link to video](#)
- **Fine-tuned performance critical sub-systems** like audio, physics simulation engine, UI rendering, particles engine, etc.

SUMMARY

Senior MTS at Salesforce in the AI Developer XP (ADX) organization. I work on high performance and highly available systems, code search, AI Dev-XP, and AI context engineering. On my days off, I am a gamer, open source maintainer and hip-hop dancer

EDUCATION

B.TECH COMPUTER SCIENCE AND ENGINEERING
Indian Institute of Technology, Roorkee, India (2021)

SKILLS

LANGUAGES

Proficient
Python, C++
Comfortable
Go, TypeScript, Java, C, PHP, UE4
Familiar
JavaScript, Bash, C#, Terraform

FRAMEWORKS/LIBRARIES

Comfortable
Kubernetes, Docker, Flask, FastAPI, Redis, RQ, Terraform, AWS Boto3, GCP Client APIs, Helix Core C++ API, Win32 API, DirectX 11, OpenGL 3, Unreal Engine 4, Godot Engine, SFML, GLFW
Familiar
DynamoDB, MySQL, OpenStack, Unity 3D, SUMO, ToroPHP

TOOLS

Claude Code, Cursor, GitHub, Perforce, VSCode, Eclipse, Visual Studio, CMake, SCons, Vcpkg, MacOS, Linux, Windows

OPEN SOURCE

[godotengine/godot](#) Former VCS maintainer
[godotengine/godot-git-plugin](#) Former Maintainer
[salesforce/p4-fusion](#) Maintainer
[sdslabs/Rootex](#) Lead developer
[sdslabs/Rubeus](#) Lead developer

SOFT SKILLS

Extremely high communication skills.
Taking full service ownership.
Following best engineering practices only when appropriate
